

GRIPPLE

Another Schwank Success Story

Installation details: A listed building occupying 30,000 sq.ft. and converted into open plan offices and factory areas, both sharing a roof height of approx. 8 metres. A tall order for traditional methods of space heating but not for 17 Schwank gas fired radiant plaque heaters. Running costs are £8,000 p.a. All heaters are suspended by Gripple Hang-Fast and the installation has proved to be a show piece for both Schwank and Gripple.
