

BRITISH STEEL PLC

Another Schwank Success Story

Installation details: The Zodiac plant at Llanwern produces metallic coated steel strip. Measuring 1,000 metres in length, 30 metres in height plus a 60 metre tower, the building is awesome! Protecting the valuable steel strip from condensation and corrosion was as important as providing personnel comfort. The installation of 50 Supra gas-fired radiant plaque heaters has been extremely successful on both counts. Energy costs amount to £7,800 p.a.
